

New Weathered Oak Coffee Table from Blueisle.co.uk

Combining classic lines with contemporary, functional form, the Weathered Oak Coffee Table from the new range at British online interiors brand Blueisle.co.uk presents the perfect centrepiece for a stylish living space.

Setting itself apart from conventional coffee table designs, its distinctive removable wooden trays offer a flexible and highly practical solution for serving and entertaining. Manufactured by hand using the finest solid oak, the fixed position cross-frame stand sturdily supports the generously proportioned table top which, with its carved inset surface, allows for the three trays to slot neatly into place. Each individual element of the table is expertly crafted with care and impeccable attention to detail from the table's gently curving profiled edges to the exposed dovetail joints.

Timeless in its silhouette and with a simplistic elegant appeal, Blue Isle's latest design features a hand-applied matt oiled finish, which not only protects but also enhances the natural grain of the oak. This results in a beautiful and quality piece of furniture that lends itself to both modern and traditional interior schemes.
